Release Plan
Project: TRVRL
Team: Team21
Release 1
Release Date: March 16, 2016

Usman Zahid,
Jyotsna Prakash,
Marvin Corro

March 16, 2016

High level goals:

This is a social networking website aimed at connecting people who love to travel. We want to have goals such as:

1. Be able to allow users to have there own profile page

2. Allow users to search up other users

3. Have a page that is visually appealing and easy to navigate

4. Allow users to be able to follow each other

5. Allow users to generate content for the site in several different ways

6. Have a chat system between users

User stories for release:

Sprint 1:

1. (Easier) As a user I want to be able to create my own profile

2. (Easy) As a user I want to be able to manage my profile

3. (Harder) As a user I want to be able to supply user content by adding destinations of places

4. (Hard) As a user I want to give tips on these destination pages for others to see

5. (Medium) As a user I want to see what people have posted in the front page

Sprint 2:

1. (Hard) As a user I want to create "itineraries" of places I am going to travel too

2. (Medium) As a user I want to be able to see other peoples "itineraries"

3. (Medium) As a user I want to be able to follow other users to keep up to date with there trips

Sprint 3:

1. (Medium) As a user I want to be able to gain recognition for posting

2. (Hard) As a user I want to be able to private message another user

3. (Easy) As a user I want to be able to share tips, risk and regrets of places I have been

Product backlog:

Here are features we would like to see on the site but move past basic functionality require to have the premise of the website done, in other words these features are supplementary and will get done if there is extra time.

1. As a user I want to be able to chat with other users

2. As a user I want to be able to be able to match up itineraries with other users going to the same places

3. As a user I want to be able to connect with users who have been to the same place

4. As a user I want a system that allows me to meet up with people who are in the same place or going to be in the same palce I am traveling too
